SUICIDES IN INDIA

INTRODUCTION :

During our long-term internship with "[Smart Bridge]", we are driven into the world of data analytics, with a primary focus on suicides in India between the years of 2001 to 2012.

In this introduction section, we will provide an overview of the importance of data visualisation in conveying insights and our objective to create informative visualisations, including dashboards and data stories.

Overview:

The overview of the topic of suicides in India during the period from 2001 to 2012, the ratio is increased 22.8%.

The highest suicide rate was observed in 2011. The majority of suicides (74.6%) were due to family problems, illness or mental health issue. The major sectors in suicides are suicide rate, causes age group and types of suicides

Purpose :

The purpose of this project is to investigate the complex issue of suicides in India, identifying trends, causes and prevention strategies to reduce the suicide rate. Through data analysis, research and stakeholder engagement, this project aims to contribute to the development of effective suicide prevention programs. To reduce suicide rates and promote public awareness.

LITERATURE SURVEY :

Suicides in India is a complex and multipurpose issue, with various studies highlighting its prevalence, risk factors and prevention strategies.

Highest suicides - Maharashtra had the highest number of suicides between 2001 to 2012, with 901,945 cases.

Lowest suicides - Lakshadweep had the lowest number of suicides, with 50 cases. The main causes of suicide is family problems were the most common cause of suicide, with 121,427 cases, followed by failure in examinations, love affairs and unemployment etc.

Mostly 15-59 years age group between highly common suicide rate.

Existing Problem :

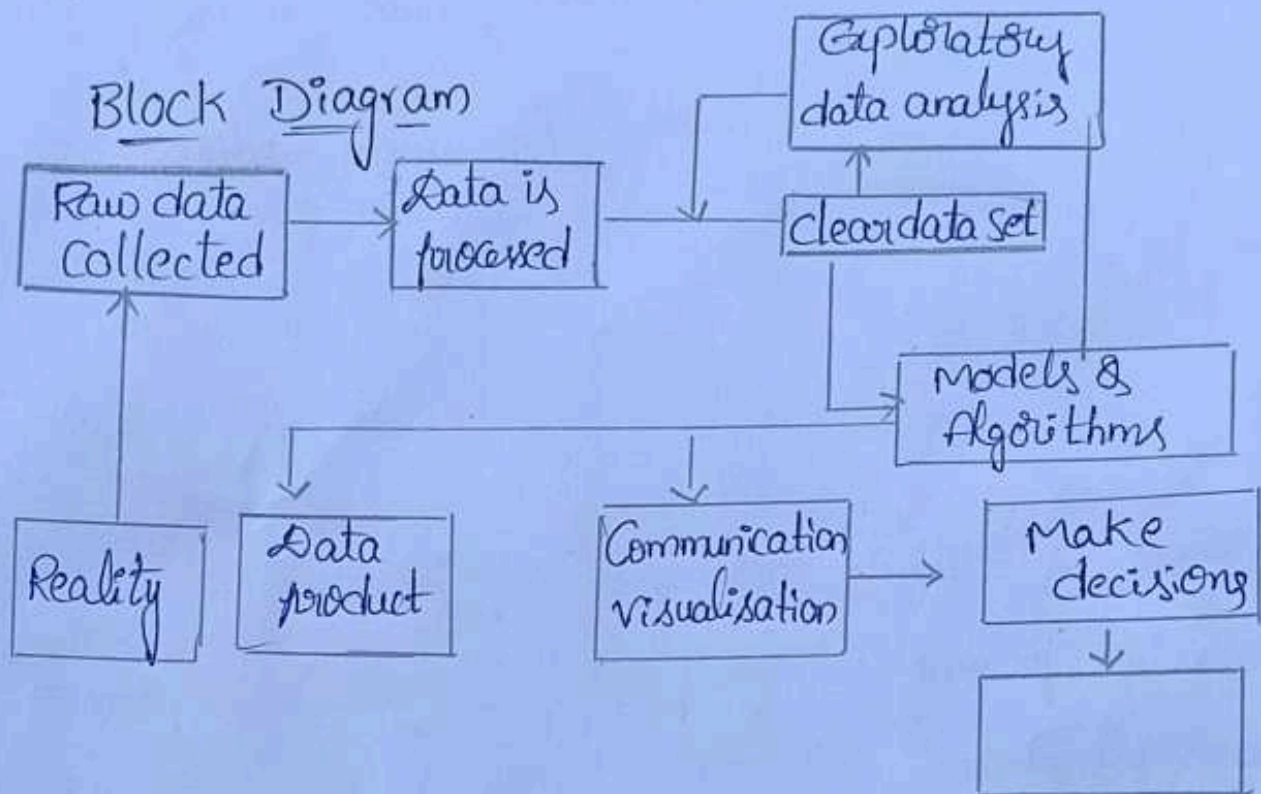

Increase access to mental health services, especially in rural areas. Train mental health professionals and provide resources for support. Promote helplines and online support platforms. Launch public awareness campaigns to reduce stigma around mental health. Improve data collection and reporting systems.

Proposed Solutions

Develop innovative solutions for suicide prevention. Establish Crisis hotlines and Emergency services. Provide immediate support and counselling. Encourages social connections and Community Engagement.

THEORITICAL ANALYSIS

Block Diagram

Hardware / Software designing

Hardware

1. Servers
2. Data Storage
3. Networking
4. work Station

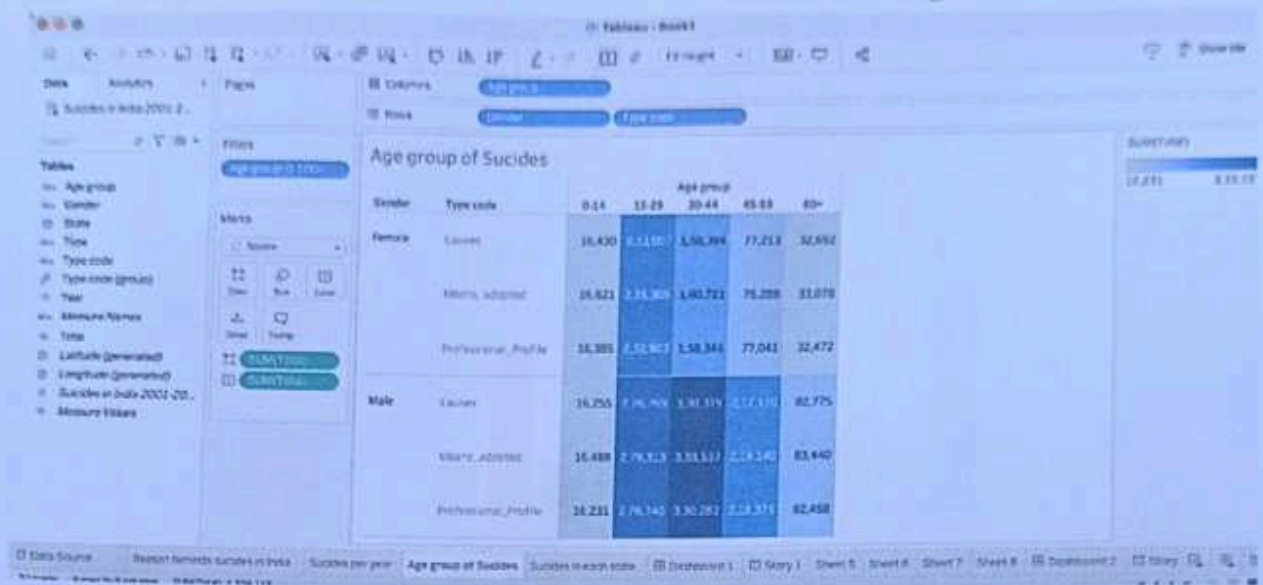

Software

1. programming languages
2. Data visualisation Tools
3. machine learning libraries
4. Database management systems
5. Operating systems

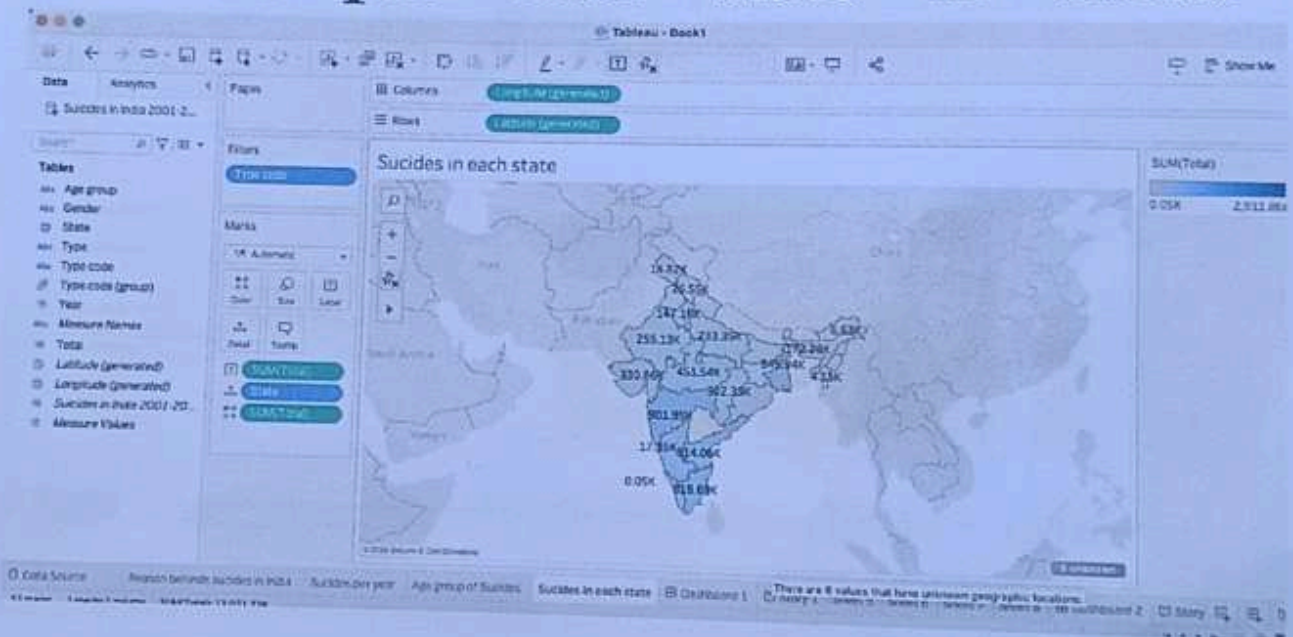

RESULT

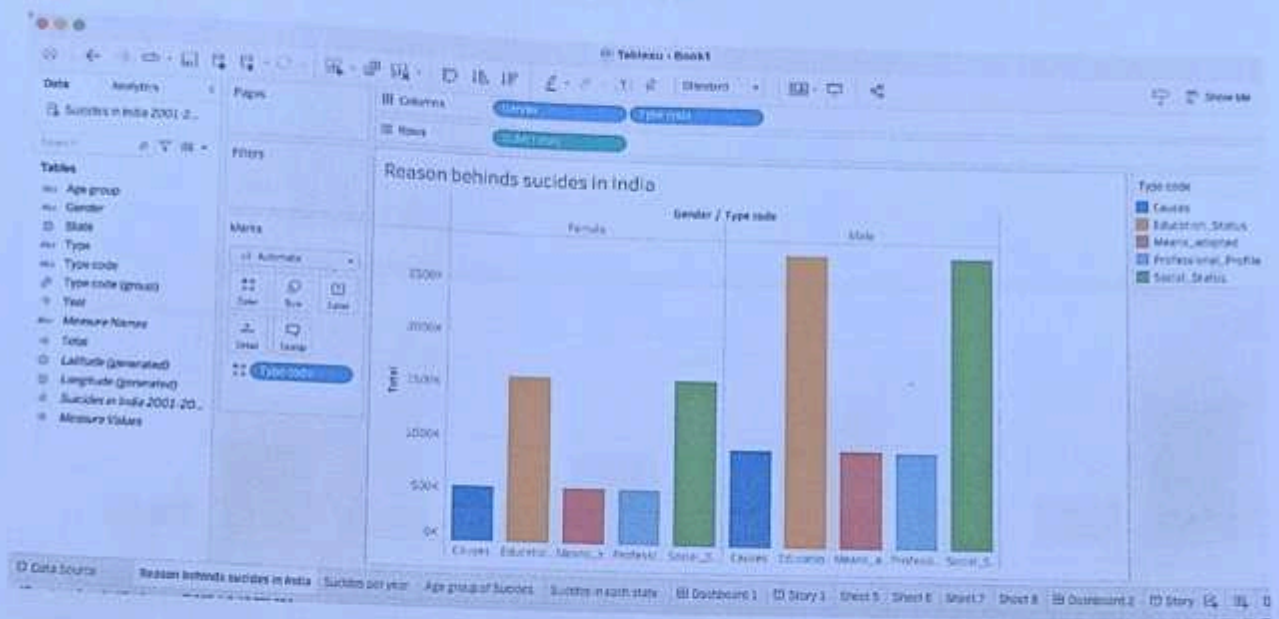

During our long-term internship with Smart Bridge along with the project name of suicides in India the result of visual Explanation among the year of 2001 to 2012. By implementing solution to decreased suicide ratio as a result.

Suicides classification on Age group

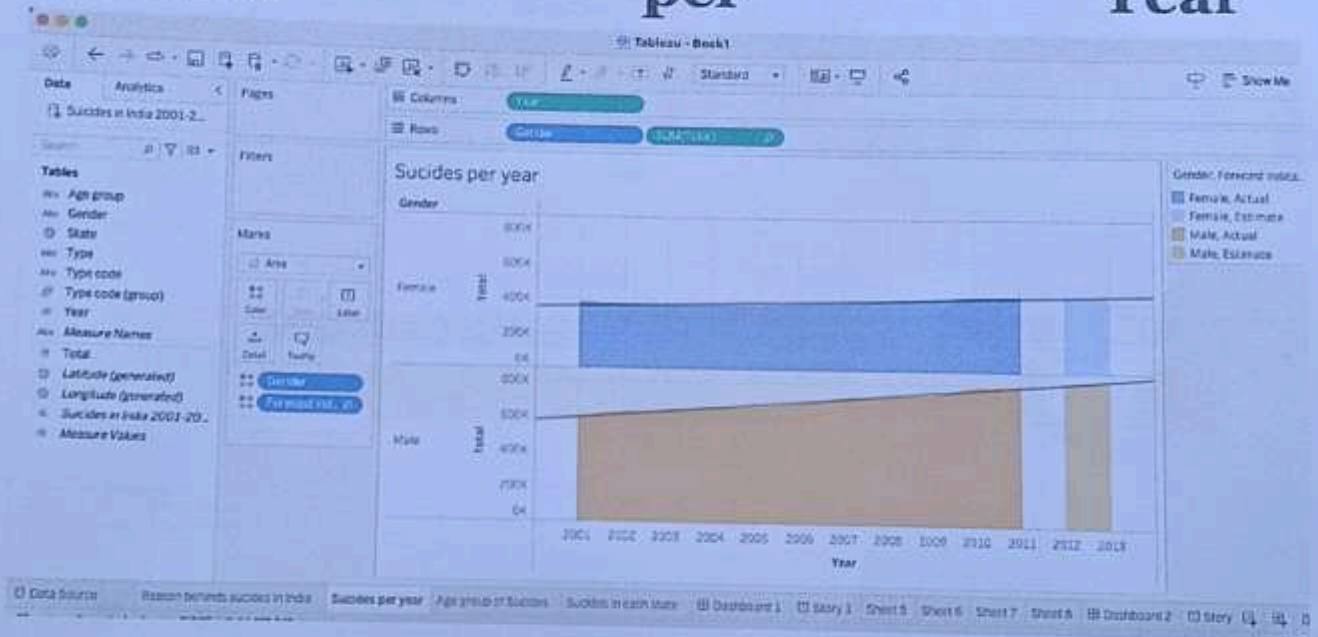

Suicides per each state in India

Suicides per Year

Dashboard

SUCIDES IN INDIA

Age group of Sucides

Gender	Type code	Age group				
		0-14	15-29	30-44	45-59	60+
Female	Cause	16,410	231,007	318,994	77,213	32,892
	Misuse, alcohol	16,621	279,308	140,721	79,289	33,870
	Professional, Profile	16,385	237,901	150,346	77,041	32,472
Male	Cause	18,255	276,759	310,310	217,120	82,775
	Misuse, alcohol	16,480	279,813	311,517	218,143	83,440
	Professional, Profile	18,281	276,760	310,282	216,775	82,460

Total

16,221

Reason behinds suicides in India

Sucides in each state

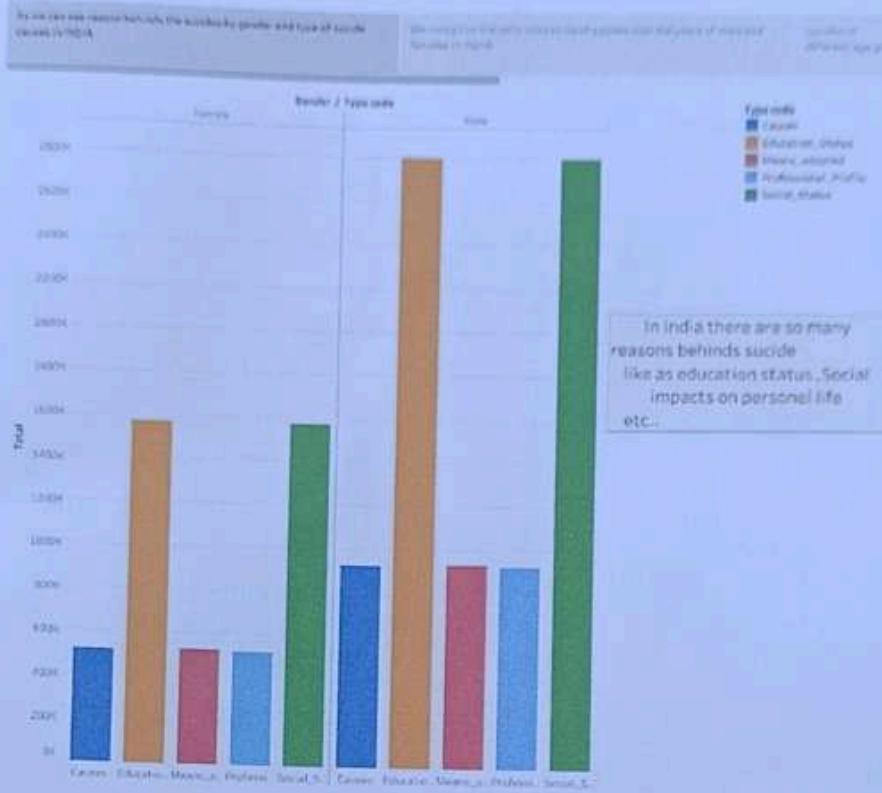

Sucides per year

Story

Story 1

story

Story 1

We recognize the value of looking at suicides over the years of male and females in INDIA.

Suicides of different age groups with cause of suicides of people in INDIA.

This is a suicide number of each state in INDIA.

Story 1

As we can see, we have made the suicides by gender and type of forecast indicator.

We recognise the ratio increasing of suicides over the years of male and females in INDIA

Success of different age groups with cause of suicides of people in INDIA

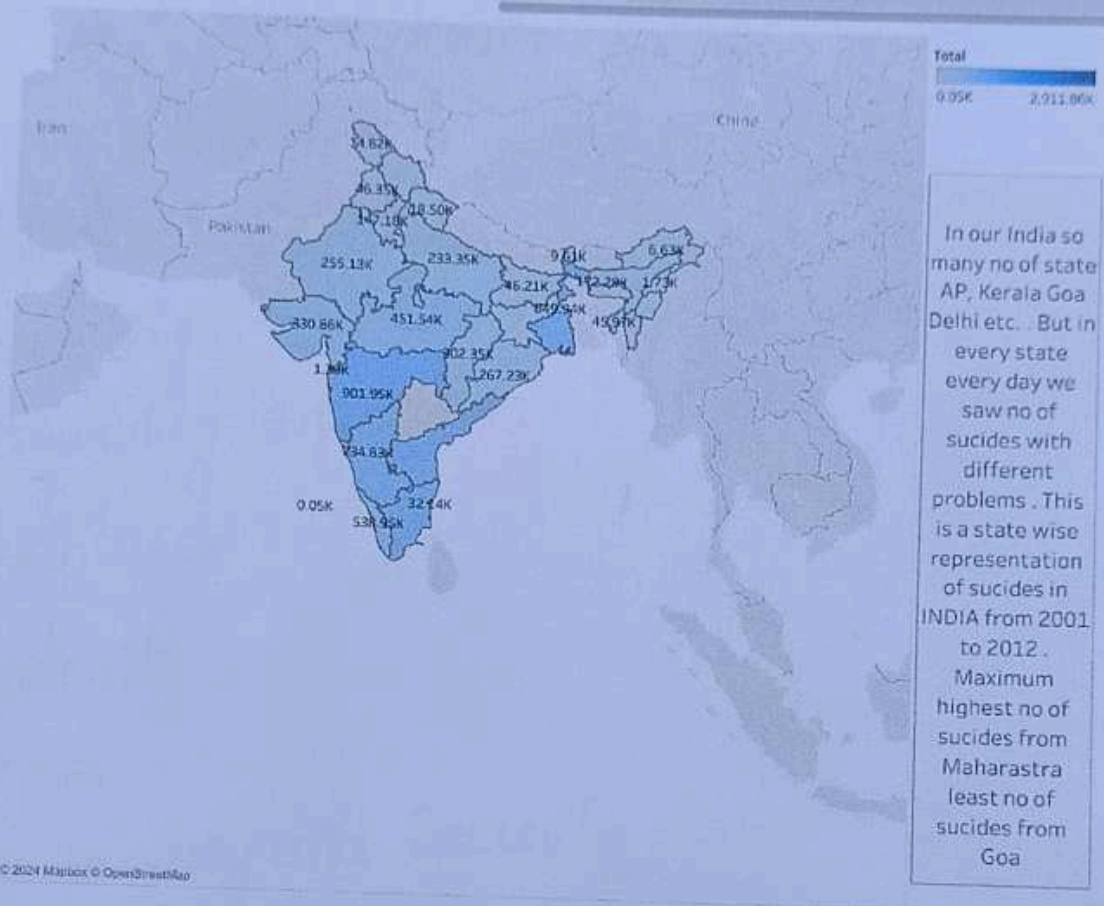

Story 1

Map to display the
sucides in india

Sucides of different age groups with total of sucides in india

This is a sucide revenue of each state in India

Advantages & Disadvantages

Advantages

1. Improved mental health support
2. Reduced Suicide rate
3. Increased awareness
4. Scalability
5. Community engagement

Disadvantages

1. Complexity
2. Stigma
3. Data privacy and Security
4. Sustainability
5. Cultural Sensitivity

APPLICATIONS

1. Research and Analysis
2. Policy Development
3. Education and Training
4. Digital Health Solutions
5. Global Mental Health

CONCLUSION :

In the Conclusion, we will summarize the significance of our internship project with Smart Bridge - this section will emphasize the value of data analytics and data visualization in the context of suicides in India. We will retrieve the key takeaways from our work and highlight its potential impact on the field.

FUTURE SCOPE :

The internship project on suicides in India has laid the groundwork for a comprehensive and sustainable approach to addressing mental health and suicide prevention. Future scope includes scaling up the project to other regions and countries, adapting solutions to local contexts. Integrating AI & machine learning to enhance data analysis, prediction, and intervention. Developing digital mental health solutions and online support platforms.

Conclusion

Finally we create a web integration by using flask .

We will summarize the significance with our internship project Smartbridge. This project emphasizes the value of data analytics by working on project .

The web integration code: INDEX.html
